

AI Disaster Incident Response Coordinator - Architecture

Architecture

Event-driven workflow orchestrated by n8n.

Components

Manual Trigger, Incident Data, Gemini Analyzer, Weather API, Resource Allocation, Executive Summary, Gmail, Google Sheets.

Data Flow

Incident → AI Analysis → Weather → Resource Plan → Summary → Email & Logging.

Security

Store credentials securely in n8n; avoid hardcoding API keys.

Scalability

Replace manual trigger with webhooks, use databases instead of Sheets, add monitoring and retries.

Future Enhancements

SMS, Teams/Slack, dashboards, authentication, audit logging.
